Additional Information

I'm a 23 year old self-taught Front-end Developer,
I really love to code and enjoy learning new concept, it feels like you're in control of your own little word.

I'm still learning so let me help you in what you need by doing so you'll also help me get better.

I'm looking forward to work with whoever is interested in my resume and reading this right now .

A hidden gem doesn't have to be the most qualified one.
